Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 23 September 2004 has been entered.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yanagawa (USPN 5,994,888) in view of newly cited art to Zeng et al. (USPN 6,366,158).

With respect to claims 1-10, Yanagawa discloses, in Fig. 1, a circuit comprising: “a voltage multiplier (14)”; “a start control unit” having a “comparator (21-24 and 26)” and a “logic unit (12)”; and “a subvoltage generating unit (remainder of circuit). While the reference to Yanagawa discloses a broad “multiplier circuit” in Fig. 1 and one embodiment of such in Fig. 13, Yanagawa, however, does not disclose the newly recited operation concerning the “direct mode”. The reference to Zeng et al. discloses, in Fig. 4, a specific “multiplier circuit”. having the advantage of self-initialization. Therefore, it would have been obvious for one skilled in the art

Art Unit: 2816

to use the specification "multiplier circuit" in Fig. 4 of Zeng et al. for the broad "multiplier circuit" of Fig. 1 of Yanagawa to obtain the expected advantage of self-initialization.

With respect to claims 10 and 16-18, clearly the above-discussed combination of Yanagawa and Zeng et al. will provide the recited method.

Claims 11-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
